

FINANCIAL REPORTING

Organizations of all sizes and types encounter financial reporting challenges.

Regulations, accounting standards and business needs continue to evolve, creating complexities for organization leaders. Meet—and exceed—your business goals, plus understand the ever-changing regulations and accounting standards by working with the Certified Public Accountants (CPAs) at Sikich. Beyond merely filing statements and staying current with your financial reporting, we will help your organization maximize its overall performance while adjusting to the regulations that grow more complex each year. You'll gain a competitive advantage crucial to the growth and future success of your organization when you partner with Sikich, as we will anticipate potential issues, recommend innovative strategies and execute proven solutions.

AUDIT

An audit enhances the degree of confidence for individuals using your financial statements by providing the highest level of assurance.

REVIEW

Do you need an evaluation of your financial statements, but not necessarily an audit? A review is substantially less in scope than an audit, takes less time and provides limited assurance on your financial statements.

COMPILATION

Do you need help gathering and presenting financial information—without requiring assurance that your financial statements are accurate? Schedule monthly, quarterly or annual compilations with Sikich, and you'll stay ahead of any potential financial reporting issues.

AGREED-UPON PROCEDURES

Whether you need loan terms evaluated or investment returns calculated, receive the information you require for your specific purposes.

WHAT DO YOU GET?

- **A Trusted Advisor**

We're here to help you grow and become a source of information and advice when problem solving, expanding or modifying your operations. We will also help you understand options, interpret data and be a voice of reason.

- **Proactive, Personalized Services**

One-on-one, you get customized solutions based on your unique needs. Focus on your core competencies while our experts implement strategies that help you achieve financial stability and growth, educate you and uncover new opportunities to elevate performance.

- **An Extension of Your Team**

Committed to providing quality services and support that promote growth and prosperity, Sikich helps you meet and understand new regulations and standards, as well as make an immediate impact on the evolution of your organization.
