REGULATORY, QUALITY AND COMPLIANCE

TRACKWISE DIGITAL MANAGED SERVICES

Streamline operations, facilitate growth

Sikich's digital managed services provide application maintenance plans through a 'support-as-a-service' business model. Our teams serve multiple software product lines for several regulated industries, with experts that specialize in TrackWise Digital and Salesforce platforms.

Streamline operations and facilitate organizational growth by implementing a program that has predictable spending, performs better, gives you faster response times, and reduces your risk, downtime and total costs.

Our support solutions are customized to manage your unique digital ecosystem. Plans can include global coverage for any combination of specialized resources, and ultimately, help avoid overspending and negative impact to your bottom line. Leverage select expertise as needed, without a full-time commitment.

Our experts have years of extensive life sciences business process experience in quality management, and quickly integrate with internal teams to deliver time-to-value. Avoid rework with under-skilled resources that can potentially break or overcomplicate system configurations, and design the perfect complement to your current team's efforts.
