SIMPLIFY YOUR DATA ARCHIVAL PROCESS

archiveIQ by is a validated archive tool that simplifies moving data out of TrackWise® and into archiveIQ's Data Repository.

WHAT IS archiveIQ?

It's an end-to-end data archive solution for TrackWise®. The product is built with a scheduling factory where archive jobs can be created and scheduled to and from TrackWise®, and a data repository with a feature-rich user interface that allows for viewing, querying and reporting on archived data.

IDEAL USE CASES

- Ongoing data archive out of one or more live TrackWise® Production systems
- Decommissioning TrackWise® systems due to Digital Transformations, consolidations and harmonizing
- Extract and delete records due to divestitures and data disentanglements
- Retain archive functionality post TrackWise 9.3 upgrade
- GLP archive requirements

FEATURES

Archive multiple TrackWise® systems into a single archiveIQ repository

Permissioned read-only interface for users to be able to query, view and report on archived records

Fully compatible with Crystal Reports and QualityView

Query, retrieve and export record data out of repository

Create unlimited archive jobs with precise criteria that can be run on demand or on any schedule

Restore records back to TrackWise®

CFR 21 Part 11 Compliant
